Data Engineer with a Master's in Data Science and hands on experience designing and deploying scalable production data pipelines and cloud based data solutions. Strong expertise in Python, SQL, and AWS, with a proven ability to build end to end ETL and ELT workflows, ensure data quality, and support large scale data processing. Experienced in working with complex high volume datasets across research and industry environments, translating business and scientific requirements into reliable scalable data solutions.

CORE COMPETENCIES

- | | |
|---|--|
| • Data Engineering & Pipeline Development | • Backend & API Integration |
| • ETL / ELT Workflow Design | • Scalable System Design |
| • Data Quality & Validation | • Report Automation & Documentation |
| • SQL Query Optimization | • Debugging & Performance Optimization |
| • Python Data Processing | • Data Visualisation (Power BI) |
| • Cloud (AWS and Databricks exposure) | • Geospatial Analysis (ArcGIS) |

PROFESSIONAL EXPERIENCE

Bioinformatics Research Assistant

Mar 2026 - Present

Minderoo Ocean Institute, University of Western Australia | Perth, WA

- Design and maintain PostgreSQL databases, relational schemas, and data models supporting large-scale eDNA and genomic research.
- Develop Python, SQL, and API based workflows to automate data extraction, validation, transformation, and integration across research datasets.
- Manage Ubuntu servers and maintain bioinformatics applications, automated workflows.
- Perform data analysis, quality assessment, and visualisation to support scientific decision making.
- Develop automated data processing and metadata management workflows aligned with FAIR principles.
- Collaborate with multidisciplinary researchers to deliver scalable data engineering solutions.
- Contribute to integrated genomic data platforms through system development, data integration, and research infrastructure.

Data Analyst Intern

Jul 2025 - Oct 2025

Alike Inc. | Perth, WA

- Designed and delivered an end to end analytics and data pipeline platform using Python, Electron, and React, supporting production data ingestion and transformation workflows.
- Built automated ETL pipelines integrating Microsoft Forms and Excel into structured datasets, applying data validation and data quality checks, reducing manual processing by 80%+.
- Developed reusable Python workflows for batch data processing, metrics calculation, and data modelling, ensuring consistency and repeatability.
- Designed and deployed Power BI dashboards integrating processed ETL outputs, improving reporting efficiency and stakeholder visibility across key metrics.

Software Engineer

Sep 2022 - Jan 2024

Amerck Inc. | Kirulapone, Sri Lanka

- Progressed from Trainee to Software Engineer based on strong technical performance and delivery quality.
- Developed and maintained backend and web applications using Java, Node.js, Express.js, and React, supporting data driven business workflows.
- Built backend services supporting data ingestion, schema design, validation, and transformation from application and API sources, contributing to cloud based data pipelines.
- Improved system reliability and data consistency by leading debugging and testing efforts, increasing legacy system stability by 40% and reducing support overhead.
- Deployed and managed cloud hosted applications on AWS, supporting application scalability, availability, and environment configuration, and produced clear technical documentation for internal teams.

Trainee Software Engineer

Feb 2020 - Aug 2020

Sierra Technology Holdings (Pvt) Ltd | Nugegoda, Sri Lanka

- Developed patient EMR system and presented it to the NBQSA 2020 competition.
- Collaborated with senior personnel to troubleshoot and diagnose issues with equipment.
- Provided technical support for engineering staff during installation activities.

EDUCATION

University of Western Australia

Feb 2024 - Dec 2025

Master of Data Science

NSBM Green University

Mar 2018 - Dec 2022

Bachelor of Science Engineering (Hons) Computer Systems Engineering

GPA: 3.85 / 4.00 (First Class Honours)

ICBT Camps

Aug 2017 - Mar 2018

Diploma Information & Communication Technology

AWARDS & CERTIFICATES

- Best Performance Award (2022) on BSc. Eng. (Hons) in Computer Systems Engineering at NSBM Green University, Sri Lanka.
- AWS Academy Graduate, completed [AWS Academy Cloud Foundations](#) course issued by Amazon Web Services Training and Certification in 2022.
- AWS Cloud Quest: Generative AI Practitioner, completed hands-on training in generative AI using Amazon Bedrock, SageMaker, Lambda and DynamoDB.
- Databricks Fundamentals Accreditation: Completed foundational training on Databricks Lakehouse architecture, data engineering, and analytics concepts.

REFEREES
