Data Engineer with a Master's degree in Data Science and hands-on experience designing production data pipelines, ETL/ELT workflows, and cloud-based data systems. Proven ability to ingest, transform, validate, and model data from multiple sources, supporting batch processing, data quality checks, and scalable analytics solutions. Strong background in Python, SQL, AWS, and production system design, with experience bridging software and data engineering to deliver scalable, reliable data solutions.

CORE COMPETENCIES

- Data Engineering & Pipeline Development
- ETL / ELT Workflow Design
- Batch & Automated Data Processing
- Data Quality & Validation
- SQL Query Optimization
- Python Data Processing
- Cloud Data Architecture (AWS)
- Backend & API Integration
- Scalable System Design
- Report Automation & Documentation
- Debugging & Performance Optimization
- Stakeholder Communication
- Data Visualisation (Power BI)
- Geospatial Analysis (ArcGIS)

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Jul 2025 - Oct 2025

Alike Inc. | Perth, WA

- Designed and delivered an end to end analytics and data pipeline platform using Python, Electron, and React, supporting production data ingestion and transformation workflows.
- Built automated ETL pipelines integrating Microsoft Forms and Excel into structured datasets, applying data validation and data quality checks, reducing manual processing by 80%+.
- Developed reusable Python workflows for batch data processing, metrics calculation, and data modelling, ensuring consistency and repeatability.
- Implemented automated report generation in PDF and Excel, delivering reliable, stakeholder-ready analytics outputs.
- Designed and deployed Power BI dashboards integrating processed ETL outputs, improving reporting efficiency and stakeholder visibility across key metrics.

IT Support

Mar 2025 - Dec 2025

Parklane Investment Group | Perth, WA

- Delivered end-to-end IT support for a mining services organisation providing vehicle and equipment hire and rail inspection operations, ensuring technology reliability across daily field and office activities.
- Supported and maintained inventory and asset tracking processes, helping teams accurately monitor equipment movements, availability, and operational usage.
- Operated as the primary onsite IT resource, independently handling user support, device setup, system troubleshooting, documentation, and ongoing technical improvements to keep operations running smoothly.

Software Engineer

Sep 2022 - Jan 2024

Amerck Inc. | Kirulapone, Sri Lanka

- Progressed from Trainee to Software Engineer based on strong technical performance and delivery quality.
- Developed and maintained backend and web applications using Java, Node.js, Express.js, and React, supporting data driven business workflows.
- Built backend services supporting data ingestion, schema design, validation, and transformation from application and API sources, contributing to cloud based data pipelines.
- Improved system reliability and data consistency by leading debugging and testing efforts, increasing legacy system stability by 40% and reducing support overhead.
- Deployed and managed cloud hosted applications on AWS, supporting application scalability, availability, and environment configuration, and produced clear technical documentation for internal teams.

Trainee Software Engineer

Feb 2020 - Aug 2020

Sierra Technology Holdings (Pvt) Ltd | Nugegoda, Sri Lanka

- Developed patient EMR system and presented it to the NBQSA 2020 competition.
- Collaborated with senior personnel to troubleshoot and diagnose issues with equipment.
- Provided technical support for engineering staff during installation activities.

EDUCATION

University of Western Australia

Feb 2024 - Dec 2025

Master of Data Science

NSBM Green University

Mar 2018 - Dec 2022

Bachelor of Science Engineering (Hons) Computer Systems Engineering

GPA: 3.85 / 4.00 (First Class Honours)

ICBT Camps

Aug 2017 - Mar 2018

Diploma Information & Communication Technology

AWARDS & CERTIFICATES

- Best Performance Award (2022) on BSc. Eng. (Hons) in Computer Systems Engineering at NSBM Green University, Sri Lanka.
- AWS Academy Graduate, completed [AWS Academy Cloud Foundations](#) course issued by Amazon Web Services Training and Certification in 2022.
- AWS Cloud Quest: Generative AI Practitioner, completed hands-on training in generative AI using Amazon Bedrock, SageMaker, Lambda and DynamoDB.
- Databricks Fundamentals Accreditation: Completed foundational training on Databricks Lakehouse architecture, data engineering, and analytics concepts.
